

R.TEJO SAMHITHA

21BCB7025 ASSIGNMENT-1

Import numpy as np

```
import numpy as np
```

Create an array of 10 zeros

```
z=np.zeros(10)
z
array([0., 0., 0., 0., 0., 0., 0., 0., 0., 0.])
```

Create an array of 10 ones

```
z=np.ones(10)
z
array([1., 1., 1., 1., 1., 1., 1., 1., 1., 1.])
```

Create an array of 10 fives

```
a=np.full(10,5)
a
array([5, 5, 5, 5, 5, 5, 5, 5, 5, 5])
```

Create an array of the integers from 10 to 50

```
arr=np.arange(10,51)
print(arr)
[10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32
 33
 34 35 36 37 38 39 40 41 42 43 44 45 46 47 48 49 50]
```

Create an array of all the even numbers from 10 to 50

```
arr=np.arange(10,51,2)
print(arr)
[10 12 14 16 18 20 22 24 26 28 30 32 34 36 38 40 42 44 46 48 50]
```

Create a 3x3 matrix with ranging 0 to 8

```
x=np.array([[0,1,2],[3,4,5],[6,7,8]])
x
```

```
array([[0, 1, 2],
       [3, 4, 5],
       [6, 7, 8]])
```

Create a 3x3 identity matrix

```
w=np.eye(3)
w
array([[1., 0., 0.],
       [0., 1., 0.],
       [0., 0., 1.]])
```

Use numpy to generate a random between 0 and 1

```
b=np.random.rand()
print(b)
0.6453948399931683
```

Use numpy to generate an array of 25 random numbers sampled from a standard normal distribution

```
c=np.random.randn(25)
print(c)
[-0.04350944  0.6129072  1.18968759 -2.172872  -0.25149799 -
0.48039106
 0.34567165 -0.05220856  0.07151708 -0.89442106  0.82873688
1.58335997
-1.09309842  0.93005711  0.31939034 -0.80700204  0.21156197 -
0.00302623
-0.40345819 -0.21067242 -0.63960206  0.67301929 -2.23804879
1.61080827
1.16884665]
```

Create the following matrix

```
d=np.arange(0.01,1.01,0.01).reshape(10,10)
print(d)
[[0.01 0.02 0.03 0.04 0.05 0.06 0.07 0.08 0.09 0.1 ]
 [0.11 0.12 0.13 0.14 0.15 0.16 0.17 0.18 0.19 0.2 ]
 [0.21 0.22 0.23 0.24 0.25 0.26 0.27 0.28 0.29 0.3 ]
 [0.31 0.32 0.33 0.34 0.35 0.36 0.37 0.38 0.39 0.4 ]
 [0.41 0.42 0.43 0.44 0.45 0.46 0.47 0.48 0.49 0.5 ]
 [0.51 0.52 0.53 0.54 0.55 0.56 0.57 0.58 0.59 0.6 ]
 [0.61 0.62 0.63 0.64 0.65 0.66 0.67 0.68 0.69 0.7 ]
 [0.71 0.72 0.73 0.74 0.75 0.76 0.77 0.78 0.79 0.8 ]
 [0.81 0.82 0.83 0.84 0.85 0.86 0.87 0.88 0.89 0.9 ]
 [0.91 0.92 0.93 0.94 0.95 0.96 0.97 0.98 0.99 1.0 ]]
```

```
[0.81 0.82 0.83 0.84 0.85 0.86 0.87 0.88 0.89 0.9 ]
[0.91 0.92 0.93 0.94 0.95 0.96 0.97 0.98 0.99 1.  ]]
```

Create an array of 20 linearly spaced points between 0 and 1

```
s=np.linspace(0,1,29)
print(s)
```

```
[0.      0.03571429 0.07142857 0.10714286 0.14285714 0.17857143
 0.21428571 0.25      0.28571429 0.32142857 0.35714286 0.39285714
 0.42857143 0.46428571 0.5       0.53571429 0.57142857 0.60714286
 0.64285714 0.67857143 0.71428571 0.75      0.78571429 0.82142857
 0.85714286 0.89285714 0.92857143 0.96428571 1.      ]
```

numpy indexing and selection

```
mat=np.arange(1,26).reshape(5,5)
mat
```

```
array([[ 1,  2,  3,  4,  5],
       [ 6,  7,  8,  9, 10],
       [11, 12, 13, 14, 15],
       [16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
```

```
mat[2:,1:5]
```

```
array([[12, 13, 14, 15],
       [17, 18, 19, 20],
       [22, 23, 24, 25]])
```

```
mat[3,4]
```

```
20
```

```
mat[0:3,1:2]
```

```
array([[ 2],
       [ 7],
       [12]])
```

```
mat[-1,:]
```

```
array([21, 22, 23, 24, 25])
```

```
mat[-2,:]
```

```
array([[16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
```

Get the sum of all the values in mat

```
mat.sum()
```

```
325
```

Get the standard deviation of the values in mat

```
k=np.std(mat)
```

```
print(k)
```

```
7.211102550927978
```

Get the sum of all the columns in mat

```
a=np.sum(mat,axis=0)
```

```
print(a.tolist())
```

```
[55, 60, 65, 70, 75]
```

```
d=np.array([55, 60, 65, 70, 75])
```

```
d
```

```
array([55, 60, 65, 70, 75])
```

```
d.sum()
```

```
325
```
